VENDOR TALK – APRIL 2022

SAFER FLOORS MAKE SAFER ACTIVE ENTERTAINMENT FACILITIES

A Guide to Flooring
for Climbing and Active
Entertainment Facilities

THE IMPORTANCE OF FLOORING

A perfect example of how valuable safety flooring is can be taken from indoor boulder climbing where it is mandatory in most parts of the world, to put some impact-absorbing material underneath the artificial climbing structure. The purpose of the impact-absorbing flooring for bouldering is to be able to accommodate landings, when falling from at least the top of the boulder, and minimize injuries.
