RideWare RMS  
REAL ESTATE MANAGEMENT SOFTWARE

## ABOUT US!

**Rideware Real Estate Software provides** wide range software solutions to overcome all real estate management challenges. The goal of our company is to provide a solution that fits with your way of doing business (full customization process). Our software provides you with a centralized database for client information. It makes it easy to segment contacts based on categories like current clients, new leads, network, housing criteria, and more. You can manage and share documents, set permissions, track performance, and aggregate your data plus you will also know exactly who to contact and when to contact them.

**Rideware** comes with smart marketing automations and transaction management functionality too. It integrates with marketing campaigns, reporting tools, monthly newsletters, social media integrations, lead automation, and customizable landing pages.

The software can implement customized solutions for managing commercial tenants, commercial landlords, buyers, sellers, investors, commercial developers, and capital markets. These will allow you to forecast revenue, measure KPIs, reduce vacancies, track lease expirations, and more.

We always offer excellent customer service to all our clients and thus unlimited training and free 24/7 support are our added advantage unlike others.

## Rideware Real Estate Software – Why?

With our software integration we could 100% guarantee you the following benefits to your **Real Estate** firm

## Increase residence & tenant retention rates

The real estate management processes can be simplified effectively end-to-end with a highly functional real estate software solution which we provide. We believe that Real estate is indeed a high investment business and you can't afford to make even a small mistake.

## **Tenant / Buyer/ Sales Contract management**

Managing different types of contracts, those with tenants, brokers, and owners is an intimidating task when done manually. Our ERP solution gives you the accurate set of features to professionally manage all types of contracts throughout their maturation for higher returns.

## Effective Integration with Accounts

Our software lets you to automate the financial postings related to your properties. Managing the finances related to the properties is a major challenge faced by the industry and thus we provide solution that is seamlessly integrated with accounts. We focus on points like PDC Management, Installment Plans, Payment Schedule etc.

## Building maintenance with Inventory Control.

Rideware software ensures appropriate maintenance which not only keeps your tenants happy but also helps you save a lot of money. Our software alerts and ensure that you carry out periodic maintenance activities & quickly respond to maintenance requests from tenants. We can also integrate maintenance material store inventory like providing data on material stock availability and usage according to the demand of tenants and generate various reports based on same function which will enable further saving of your finance.
